Çelik Arms Industry, which makes production in Turkey and in world standards, carries out most of its production mainly in the USA. exports to many countries in the world.

WINTECH

9X19mm SEMI AUTO PISTOL

CROSSLINE-C

9X19mm SEMI AUTO PISTOL

Crossline-C is a 9x19mm semi auto pistol platform that is optimized for accuracy, realistic training, and offers limitless customization from front to back. It is manufactured with the latest technology and careful R&D work. Engineered to fire the 9x19mm ammo and designed for both training and tactical shooting, the Blade model is a firearm that brings out of the box precision, performance, and value in an iconic design. It is a new and ideal choice for law enforcement, shooting competitors and for shooters who are seeking a controllable and compact firearm.

It provides high durability and high accuracy even under the most difficult conditions thanks to its aluminum lower and upper receiver and handguard. Besides its pistol grip stock version, with its unique 8-stage telescopic stock and folding stock options, it provides ease of shooting and rich operating preferences.

Available in popular Cerakote options, the Crossline-C is compatible with full size Glock magazines which allows shooters to share ammunition between their handgun and Blade model. It field strips without the use of tools by simply removing 2 takedown pins to separate the major components for maintenance. Crossline-C has 2 magazines release buttons located at the bottom and side and this bonus feature provides fast magazine changing and easy focusing opportunities.

A wide range of accessories in the market can be also mounted to give users the ability to reconfigure their Blade model to suit their individual needs whether for home defense, competition or duty use.

CROSSLINE CARBINE

9X19mm

A highly accurate and reliable 9 × 19 caliber semi-automatic carbine with a 16 "barrel that's fitted with either a barrel shroud or a muzzle brake. Its long aluminum fore end is equipped with a modern KeyMod attachment system for comfortable handling.

The unique design of the of our PCC offers its users many benefits, such as advanced ergonomics, high accuracy, comfortable handling, easy disassembly, impressive reliability and extremely fast reloading. Its fully aluminum frame contributes an excellent mechanical resistance and a long service life.

The mounting rail on the upper receiver allows you to attach a range of accessories, such as red dot sights, flashlights, laser pointers and more.

The charging handle is independent of the breech block carrier and remains in the forward position when firing, which increases user comfort. It is easily swappable to the right or left side of the firearm and forward-assists the breech, even under difficult conditions.

The safety and magazine release controls are ambidextrous which adds to its leading ergonomics. The bolt catch/release lever is positioned on the left side and allows for fast reloading. It can be intuitively controlled by the thumb or index finger when a full magazine is inserted.

The adjustable radius of the pistol grip ensures comfortable and convenient access to the trigger at the proper distance at all times.

The threaded muzzle is fitted with an effective flash hider as standard, with the option of replacing with a suppressor if required.

The highly durable and easy to remove shoulder stock is made from reinforced polymer and features telescopic adjustment, which allows you to reach the optimal shooting position. The trigger is conveniently accessible, even when the stock is folded.

Thanks to its simple construction philosophy, no tools are required for dismantling which provides a trouble-free maintenance and cleaning.

Semi Auto Version

CHIMERA hunting rifle is resistant to impacts thanks to its strong polymer stock and provides convenience to the user with its ergonomic design.

The body of the gun is made of steel alloy aluminum material and gives confidence to the user. Additionally, there is a world standard picatinny rail located at different points of the gun and it is compatible to all accessories.

The barrel is carefully machined from high quality steel raw material and ensures absolute target accuracy with its specially produced front sights. CHIMERA will bring the hunt to you.

Push Button Version

We, as Celik Arms, proudly introduce our patented new evolution .223 caliber "User Friendly" and modern sporting rifle to The World.

With the help of its pushbutton feature and system, you don't need to put up the same struggle and battle that you normally do with bolt action or pump action firearms which always causes to miss the target. Aiming is maintained between each shot which makes repeat shots easier and enables the shooter to concentrate on his target all the time.

Thanks to the time gained in the reloading phase, shooters can concentrate on their firing action. So, this enables you the guarantee of a second shot, as the shooter's concentration stays on keeping the target in his sights thanks to fast, ergonomic and easy handling. The end users always feel the sturdiness, reliability and durability of the gun for instinctive firing.
